MANUAL CODE REVIEW

● Minor-risk

1 minor-risk code issue found

Could be fixed, and will not bring problems.

1. The return value of an external transfer/transferFrom return value is checked.
Recommendation: use SafeERC20, or ensure that the transfer/transferFrom return value is checked

```
function transferFrom(  
    address sender,  
    address recipient,  
    uint256 amount  
) external returns (bool);
```

● Medium-risk

0 medium-risk code issues found

Should be fixed, could bring problems.

● High-Risk

0 high-risk code issues found

Must be fixed, and will bring problem.

● Critical-Risk

0 critical-risk code issues found

Must be fixed, and will bring problem.

HONEYPOT REVIEW

- Ability to sell.

- The owner is not able to pause the contract.

- The owner can change fees, but can't set fees over 25% (liquidity, marketing, and token reward fee)

The top-left corner of the page features a series of overlapping geometric shapes. A dark blue triangle is positioned at the very top-left, partially overlapping a light blue triangle. Below these, a medium blue triangle points downwards and to the right, also overlapping the light blue background.

Note: Please check the disclaimer above and note, that the audit makes no statements or warranties on the business model, investment attractiveness, or code sustainability. The report is provided for the only contract mentioned in the report and does not include any other potential contracts deployed by the project owner.

The bottom of the page is decorated with a complex arrangement of geometric shapes. It includes several triangles and polygons in various shades of blue, from light to dark. Some shapes are solid, while others are outlined or layered, creating a dynamic, abstract pattern that spans the width of the page.
